U.S. Citizen | [ishaani.jain1@gmail.com](mailto:ishaani.jain1@gmail.com) | Seattle, WA & Irvine, CA | [linkedin.com/in/ishaanijain](https://www.linkedin.com/in/ishaanijain) | [github.com/ishaanijain](https://github.com/ishaanijain) | [ishaani.site](https://ishaani.site)

## TECHNICAL EXPERIENCE

### ***Stealth Mode Startup - Founding Engineer | September 2025 – Present***

- Building Document Genie, an intelligent document processing system for aviation compliance, in collaboration with the founder
- Developed an extraction pipeline achieving **94% accuracy** on pilot certifications, aircraft maintenance logs, and license expiration dates, enabling automated compliance alerts
- Architected a scalable multi-tenant platform using AWS CDK, Lambda, S3, DynamoDB, and API Gateway, processing **500+ documents with sub-3-second extraction time**
- Integrated AWS Bedrock with Claude Sonnet for AI-powered document parsing and structured data extraction
- Implementing role-based authorization using AWS Cognito, enabling managers to oversee subordinate document compliance
- Secured **2 international aviation clients** (Middle East and India) for pilot program deployment
- Wrote comprehensive unit and integration tests using Jest, maintaining **90%+ code coverage**

### ***AI Safety Research Fellow - SPAR | January 2026 – Present***

- Selected for **competitive** 8-week AI safety research fellowship focused on alignment research
- Conducting weekly paper discussions and collaborative research sessions on AI evaluation methodologies

### ***External Project Collaborator - AI@UCI x GoFlyy | January 2026 – Present***

- Selected through rigorous application process (**3 accepted from 70** applicants, **~4% acceptance rate**) requiring NDA, written application, and technical interview
- Collaborating with GoFlyy, a professional delivery service, to build AI-powered backend systems for clothing condition assessment
- Developing scoring and routing logic to process computer vision model outputs and determine item destinations based on damage severity

### ***C2S Technologies Inc. - Software Engineering Intern (Team Lead) | July 2025 – September 2025***

- Won internal pitch competition (**1st place out of 11 teams**), securing **\$10K in funding** from CEO and founders
- **Led a team of 3 engineers** through end-to-end development of a startup matchmaking platform enabling investors to discover pitches, make micro-investments, and participate in crowdfunding
- Built full-stack application using Next.js, Firebase, MongoDB, and Vercel AI; developed mobile app using React Native and Expo
- Implemented AI-powered features using Vercel AI to summarize startup pitches and match investors with relevant opportunities

## PROJECTS

### ***Calendar AI | Python, Claude API, Google Calendar API, React***

- Built an AI-powered scheduling assistant that automates calendar management through natural language input
- Scheduled **1,000+** events across **5 beta users** with **80%** conflict-detection accuracy
- Integrates with Google Calendar to read existing events, identify conflicts, and find optimal time slots automatically
- Parses natural language requests like "study for 2 hours" or "gym sometime today" and syncs changes directly to calendar

## EDUCATION

**University of California, Irvine — B.S. in Computer Science and Physics**

**Expected Graduation: 2028 | Started: 2025**

**Organizations:** UROP Research Fellow, Hack@UCI, AI@UCI, ICSSC

**Additional:** Machine Learning Specialization (Andrew Ng), Web Development - Coursera

**Relevant Coursework:** C++, Java, Data Structures, Discrete Mathematics, Informatics, Multi-variable Calculus, Mechanics

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, HTML, CSS, C++, Java Frameworks & Libraries: Next.js, React

Native, Expo **Cloud & Infrastructure:** AWS (CDK, Lambda, S3, DynamoDB, API Gateway, Cognito, Bedrock), Firebase, Vercel AI **Databases:** MongoDB, DynamoDB

**AI/ML:** AWS Bedrock, Claude Sonnet, Vercel AI, TensorFlow, PyTorch, NumPy Tools: Git, Jest

## LEADERSHIP

**Petty Officer Second Class — U.S. Naval Sea Cadet Corps | September 2021 – June 2025**

One of three statewide to reach rank; supervised 350+ cadets; awarded VFW Naval Sea Cadet Medal for outstanding leadership
